A wedding is a very important festive event, during which the bride should have everything flawlessly from the dress and accessories to makeup and hairstyle. Hairstyle is a basic element of the hair style, since it is an important accent in the image.

The subject of our research is the modern wedding hairstyles of 2018. In order to develop the technology, we have analyzed the types of wedding hairstyles in the hairdressing business. The most important thing in any modern hairdresser is that it is suitable for a specific representative of a beautiful sex. The main requirement for fashionable hairdresses is now - chic and volume. It is especially important not to be mistaken in the combination of wedding dresses, hairstyles and makeup. These are the main elements of the bride's appearance, and they should look harmoniously as a whole. Choosing a hairstyle for a wedding depends on many nuances, but here you can highlight the highlights. For any hairstyle there are three main criteria for choosing:

Firstly, the wedding hairstyle should be comfortable and quite reliable. She will have to endure a rather serious test. In addition, it is impossible for the bride to feel uncomfortable. Secondly, it is necessary to take into account the shape and features of the structure of the face. The wedding hairstyle should not only decorate and emphasize the natural beauty of the bride, but also to cover up, unfortunately, there are all shortcomings. Thirdly, bridal hair should be in harmony with all other elements of the image. Especially with the main components, such as: a wedding dress and a bridal bouquet.

Wedding hairstyles with upholstered hair have always been popular with brides of all ages around the world. The gathered hairstyles are not only comfortable and practical, but also look very gently, making the image of the bride perfect and refined. The cluster of hair and the wedding dress on the floor are mandatory elements of the traditional image of the bride, a combination of sophistication, nobility and perfect taste. A modern bridal hairstyle should not be over-stretched and polished to smoothness. For today there is a lot of modern techniques that allow to unconsciously transform the appearance of women with short hair. A free and indomitable bundle, woven from harnesses and curls and assembled low on the back, is the refined simplicity that emphasizes the romantic mood of the wedding ceremony. Asymmetric beams "Shellfish" or "French twist" - always an actual hairstyle for creating an elegant and stylish image. The hair brace of the Greek spit "fish tail". Classic Greek braid on the basis of curls. Wedding haircuts with curls are one of the most common ways of festive hair styling. Hollywood volumetric waves. Luxurious volumetric curls with a diadem. Ornaments for wedding hairstyles: pearls, flowers, diadems, tiaras. Lightweight, air waves, assembled in a low beam, look particularly delicate with a hair broth decorated with pearls.

In view of the variety of wedding hairstyles, we can conclude that in the modern fashion there are no rules of curtains. The hairstyle needs to be selected, the one that will most closely match the bride and emphasize all its benefits.
